

Multi-Leaf Conductor Seal

Where pipe design movements are excessive and beyond the capability of a standard wrap type seal, the Firetex bellows seal provides the solution. The MC230 multi-leaf seal has been tested for fire and blast conditions and has been employed to accommodate movement of up to 0.5 metres. Our technical staff should be contacted for advice on your specific requirements.

Notes

- i) Seal manufactured in RDR 110/2 specification materials providing a fireproof seal to H0 in a single format and to H120 in double format.
- ii) Blast rated to 0.48 bar g.
- ii) Gas tight up to 0.48 bar g.
